SANITIZING RULES

The idea for the SANITIZING STATION was born to give a strong signal of positivity now that, in Italy as in the rest of the world, the Covid-19 requires us to re-evaluate all those small / large attentions to personal hygiene that we have already taken for granted. But no! Washing your hands several times a day, means protecting yourself and your neighbor. Before it was a simple foresight, today it is an imperative that F.lli Perin wants to transform into "Life Style".

SANITIZING STATION

The structure in AISI 304 stainless steel allows a perfect and persistent service hygiene as the material can be easily sanitized with normal detergents. The modularity of the accessories, the possibility to customize the structure (e.g. with the company logo) and the choice between different colors obtained with special nano-technologies, transforms the SANITIZING STATION into a perfect piece of furniture ready to fit into any space with elegance, from the most classic to the most modern.

Body	Dispenser
Schotch brite	Schotch brite
Schotch brite	BA polished
BA polished	BA striped
BA polished	Various Colours
Colored	BA polished

Optional
Basket Black
Basket Silver
Masks holder
Accessories on request

Material: Inox AISI 304 thickness 1,5 mm

Total size: 370 x 400 h 1500 mm

Gel dispenser dimensions: 100 x 100 h 85 mm

Gloves holder dimensions: 250 x 125 h 100 mm

Net weight: 12 Kg (no basket)

Packaging: carton box

Mobile Sanitaizing Washbasin

IL DISTANZIAMENTO SOCIALE ABBINATO

ACQUA PULITA

UNA SOLUZIONE PER RENDERE FACILE E DIVERSENTE
UNA COSA COMUNE, QUOTIDIANA, RIPETITIVA...
COME LAVARSI LE MANI.

Mobile Sanitaizing Washbasin

The Movable Sanitaizing Wash basin by F.lli Perin has been designed to facilitate daily action, such as hand washing, but has become of vital importance worldwide. Designed for common areas, both indoor and outdoor, it moves easily thanks to the 4 swivel wheels, does not need connection to the water supply, the touch dispenser avoids water waste and the two-container system, easily accessible, prevents contamination between incoming and outgoing water.

From design to construction: final destination Ireland!

ETERE

The Air Purifier
by F.lli Perin
is a real
innovation!

modern
elegant
stainless steel

The Air Purifier by F.lli Perin wins for the Scientific Innovation and for the Design, ETERE is born!

Thanks to the collaboration with **Metalarredo srl** (Project **airlightPRO - Breathe Pure Air**), **F.lli Perin** brings all its sixty years of experience in processing Stainless Steel for a new Design Air Purifier for the home and collective areas.

Metalarredo and F.lli Perin, two world-leading companies from Treviso, have decided to join their skills to face together an international market in fast evolution, moved by dynamics where the **Home Air Purifiers** are inserted more and more in a "Collective Feeling" tied not only to Health as to a new concept of "Sustainability of Life on Earth".

Not for nothing the new creation of OFFICINA PERIN, the new internal department for Design and new Prototypes of F.lli Perin, is inspired by mythology, because **ETERE is born to give everyone a cleaner air, a higher air that only "The Gods breathe"**.

ETERE is a table air purifier which, for its Minimal Design with 304 Stainless Steel covering, fits perfectly in both domestic and collective places, able to break down bacteria, oxides of nitrogen and volatile organic compounds.

The heartbeat of ETERE is the Project **airlightPRO** that, thanks to the collaboration with the **Milan Polytechnic**, excels among the Air Purification Systems reaching impressive performances and allowing a complete purification of the environment with very few air recycles:

- **Viruses and bacteria (CFU):** about 90% stuck in the filter and 100% sanitized
- **Volatile organic compounds (VOC):** a percentage of at least 30% is purified by photocatalysis
- **Solid particulate matter (PST):** 97% (from PM 0.5 to PM 10) is locked on filter
- **Nitrogen oxide (Nox):** up to 80% is oxidized by non-toxic species

TECHNICAL INFORMATION

ETERE, the best Air Purifier for Home, Office and Public areas, has **low energy consumption** and “zero” maintenance costs as special filters can be easily regenerated by washing them in water with normal detergents or disinfectant solutions, such as those that can be used for the Anti Covid-19 masks.

It's quiet, light (3 kg) and it's powered at 12 V, like any mobile phone. Easy inspection and maintenance are perfect for continuous use both at home, in the office or in public places.

The package is completed by an adhesive label with Qrcode that can be exposed to highlight that the air of the environment is purified by the airlightPRO system. **The QR code allows easy reading from all smartphones models.**

*F.lli Perin srl, with Etere, is partner of the project **airlightPRO** by Metalarredo srl, a patented system Nr. 102019000021999 of 22/11/2019 “Filtration device of air”*

Material: AISI 304 stainless steel

Total dimensions: 200 x 130 h 210 mm

Net weight: 3 Kg

Packaging: carton box

ETERE

F.lli Perin is a world leader in the stainless steel processing for the production of components for large systems in the HoReCa sector, community, industry and furnishings. Always guaranteeing a "Made in Italy" supply chain, the success of F.lli Perin is based on the trio: Technology, Certification, Innovation where, alongside the great competence in industrial processes, there is a team of designers able to catch every new trend and market need.
