

F.lli Perin S.r.l. has developed a quality, safety and environmental policy in order to achieve the greatest effectiveness on the market and the best efficiency within the company, while keeping active a sustainable program of environmental protection and risk mitigation for workers' safety and health.

The main goals of this policy are therefore:

**Customer satisfaction**  
**The continuous improvement of its processes**  
**Environmental safeguarding**  
**The mitigation of risks to workers' health and safety**  
**Compliance with current legislation**

The points by which the organization implements the Policy and pursues the Objectives are:

- To understand **customers' needs**, in order to formalize within the given timeframe, the most appropriate solutions, with the highest level of service, achieving maximum customer satisfaction;
- Ensure adequate satisfaction of all **stakeholders**;
- carry out all operations related to its work activities in total safety, with the aim of **preventing any damage to the environment and minimizing its environmental impact**;
- carry out all work activities, from budgeting to production, in suitable work environments and with suitable equipment, in order to **eliminate or mitigate risks to the safety and health of workers**;
- constantly keep under control all business processes, environmental aspects and impacts, products and services received and provided, through **monitoring activities** and appropriate indicators;
- select, train and educate **its employees** on the goals and objectives of the quality, safety and environmental management system set by management;
- enhance and foster participatory behaviors and attitudes of its collaborators and employees, in all activities promoted by the company to elevate the "**Culture of Quality, Safety and Environment**", encouraging self-responsibility and promoting all improvement-oriented individual initiatives;
- operate in compliance with **current legislation and regulations** related to environmental and safety management, setting ever-increasing goals to make continuous performance improvement effective.
- **monitor and select suppliers** by improving the relationship of cooperation, recognizing the most reliable ones;
- **manage nonconformities** and apply the necessary actions to improve the product and consequently reduce costs and generate more profit;
- deal **quickly and effectively** with any environmental and safety incidents, taking appropriate **corrective action** by investigating the root causes;
- carry out periodic **reviews of accidents and hazardous situations** on safety and the environment, aimed at verifying the effectiveness of the corrective actions taken and the progress made by ensuring compliance with this policy.
- Commit to the **continuous improvement** of the effectiveness of the management system for quality, environment and workers' safety and health;

The adoption of the management models for quality **UNI EN ISO 9001:2015**, for the environment **UNI EN ISO 14001:2015** and for safety **UNI ISO 45001:2018** is an integral part of the Company Policy.

The management systems function is responsible for maintaining and updating the management system for quality, safety and environment.

The management
