# SANITIZING STATION

Examples of possible colorway, other colorway on request.  
In the image combination of black colored stainless steel and BA/SB striped.

## SANITIZING RULES

The idea for the SANITIZING STATION was born to give a strong signal of positivity now that, in Italy as in the rest of the world, the Covid-19 requires us to re-evaluate all those small / large attentions to personal hygiene that we have already taken for granted. But no! Washing your hands several times a day, means protecting yourself and your neighbor. Before it was a simple foresight, today it is an imperative that F.lli Perin wants to transform into "Life Style".

# SANITIZING STATION

The structure in AISI 304 stainless steel allows a perfect and persistent service hygiene as the material can be easily sanitized with normal detergents. The modularity of the accessories, the possibility to customize the structure (e.g. with the company logo) and the choice between different colors obtained with special nano-technologies, transforms the SANITIZING STATION into a perfect piece of furniture ready to fit into any space with elegance, from the most classic to the most modern.

Body	Dispenser
Schotch brite	Schotch brite
Schotch brite	BA polished
BA polished	BA striped
BA polished	Various Colours
Colored	BA polished

Optional
Basket Black
Basket Silver
Masks holder
